

Landscape Posts & Chain Accessory Pack for 90° Corner 5200-90Corner Installation Instructions

Before you begin installation, please consult your local building code and/or pool code to ensure this product is suitable for your application. Periodic maintenance and testing to ensure proper operation is recommended.

Package Contents:

- 1 Black Link to Screw
- 2 Black Hex Bolts
- 2 Black Washers
- 2 Black Nuts

Recommended Tools:

- Power Drill with a 1/4" Bit Suitable for Metal
- Measuring Tape
- Marking Tool
- Bolt Cutters for Chain
- 10mm Socket
- 10mm Wrench

This accessory pack has a couple of different applications. It allows our Boston or Central Park post and chain system to turn 90 degrees in both a single and a double chain configuration. It can also be used in a double chain configuration to terminate the lower run of chain at an end post.

90 Degree Corner Installation:

Using the Link to Screw as a template, drill two 1/4" holes in your post as close to the bottom of the cap as is practical. Slip the Link to Screw through the last link of chain in your new run of chain, insert two hex head bolts from the chain side through the post and affix the washers and nuts to the inside of the post. This will ensure a finished look on the outside of the post.

End Post Installation for Double Chain Configurations:

Using the Link to Screw as a template, drill two 1/4" holes in your post in line with the height of your remaining double chain run. Slip the Link to Screw through the last link of chain, insert two hex head bolts from the backside side of the post through the post and through the link to screw. Affix the washers and nuts on the chain side to create a finished look from the outside of the end post.
